

Business Angels Europe Club

Calendar 2025

Onsite - physical MatchMaking:

An ESIL Matchmaking Event (on site) connects business angels, startups and/or ecosystem players. It includes up to four of the next key elements: (each event will be announced separately in due course with full programm)

1. Innovation Ecosystem Workshop – Peer learning and capacity building for business angels, networks, and entrepreneurs.
2. International Pitching Event – Startups (deep tech or gender balance focus) pitch to investors, in-person and online.
3. Big Angel Day Matchmaking – One-on-one meetings between business angels, BA-networkmanagers and startups to explore investment opportunities.
4. Informal Network-opportunities

Organized with national business angel networks, this on site(physical) event fosters collaboration and strengthens the European early-stage investment ecosystem. It is mostly connected to a big national event relevant to business angels. A sector or gender focus may be applicable to attract a specific target audience.

Online E-Pitch:

A BAE/ESIL E-Pitch is an online pitching event where BAE Club & ESIL-members present investment-ready startups that have already received funding from business angels in their network and are poised for international expansion.

Each session focuses on a specific vertical sector and features around five to six selected startups, showcased to business angels from various networks within the BAE Club, fostering cross-border investment opportunities and collaboration.
